EDUCATION

2020 to Present

Integrated MTech. (5 Year) Mathematics And Computer Science Vellore Institute of Technology
CGPA 9.03/10.0

2019 to 2020

Bachelor of Applied Science (Hons.) Mathematics And Computer Science Institute For Excellence for Higher Education
Percentage 93.1/100

2007 to 2019

High School Diploma Physics, Chemistry, Mathematics And Informatics Practices Sagar Public School
CBSE XII 81 Percentage
CBSE X 9.0/10.0 CGPA
JEE Mains 97.467 Percentile
JEE Advanced 23K Rank

EXPERIENCE

2020 to Present

Casual Academic Vellore Institute of Technology

- Core Committee Member Google Developer Student Clubs VIT from *December 2020 to September 2021*
- Research Committee Member Association For Computing Machinery VIT from *December 2020 to August 2021*
- The Table below lists the courses I have Studied.

Course code	Course Name
CSI2003	Advanced Algorithms
CSI3020	Advanced Graph Algorithms
CSI3002	Applied Cryptography and Network Security
COMP3350	Advanced Data Visualization Techniques
CSI3025	Application Development and Deployment Architecture
CSE4031	Game Theory
CSI3003	Artificial Intelligence and Expert Systems
CSI3005	Advanced Data Visualization Techniques

SKILLS

Tools: Linux, Git, Android studio, Make, Cmake, Docker, Kubernetes

Languages: Python, R, Java, L^AT_EX, Shell, C, C++, Rust, GO, Clojure, Vue.js, WebAssembly, Yew

Certification: Listed Below

Building Distributed Applications In GO

Scala Type Classes And Parameterization

Concurrent Programming With GO

Advanced Linear Models for Data Science 2: Statistical Linear Models

Advanced Linear Models for Data Science 1: Least Squares

Advanced C Programming Integrating C and Assembly Language

Bayesian Methods for Machine Learning

Improving Deep Neural Networks: Hyperparameter Tuning, Regularization and Optimization

Image Understanding With TensorFlow on GCP

Sequence Models for Time Series and Natural Language Processing on Google Cloud

Recommendation Systems With TensorFlow on GCP

DeepLearning.AI TensorFlow Developer

Rust Essential Training

Rust Fundamentals

PROJECTS

- Electric Funeral - A Combination of Software Defined Network (SDN) And A Multi-Layer Perceptron (MLP) Neural Network That Results In The Mitigation of DDoS Attacks. *May 2021 to September 2021*
- Xen - Personal/Portfolio, Website Built With Rust, Rocket, Javascript, Tailwind CSS And L^AT_EX. *August 2021 to September 2021*
- Neural Network Art - A Neural Network That Generates Pieces of Art/Pictures Using Clojure. *August 2021 to September 2021*

INTERESTS

- Japanese And Origami Crafting *July 2021 to Present*
